

## Article 72

I. - The code of postal and electronic communications is amended as follows:

1 After 12 ° of II of Article L. 32-1, is inserted a 12 ° as follows:

"12 At a high level of environmental protection and health of the population, together with the ministers responsible for health and the environment;"

2 After the second paragraph of Article L. 34-9 is inserted the following paragraph:

"The radio terminals to be connected to a public network for the provision of telephone service can be marketed without an accessory to limit the exposure of the head to radio emissions in communications. "

3 Article L. 34-9-1 is completed by two paragraphs as follows:

"The measurement result is sent by the bodies mentioned in the second paragraph in the National Frequency Agency, which ensures the provision of the public, and the French Agency for Environmental Health and Labour. A national census of outliers in the territory in which the exposure rate has significantly exceeded the average nationally is prepared for publication later than December 31, 2012.

"When the measurement is carried out in residential premises, the results are sent to owners and occupiers. The occupants of the premises may object to the making available to the public of these results. These results should indicate the name of the supervising office. Every occupant of a dwelling may have access to the National Agency of Frequencies, in all measurements in the housing. "

Ia to III. - (No change)

IV. - In Chapter III of Title V of Book IV of Part IV of the Labour Code, it is inserted Article L. 4453-1 as follows:

Art L. 4453-1. - The rules for the prevention of risks to health and safety of workers exposed to electromagnetic fields are determined by decree of the Council of State made under Article L. 4111-6.

"This decree is consistent with the principles of prevention set out in Articles L. 4121-1 and L. 4121-2. "

V. - The single chapter of Title I of Book V of Part II of the Education Code is supplemented by Article L. 511-5 as follows:

Art. L. 511-5. - In kindergartens, elementary schools and colleges use during any activity and education in the areas designated by the Bylaws, a student, a mobile phone is prohibited. "

VI. - Local governments that carry out experiments involving exposure value transmit their results to the National Frequency Agency and the French Agency of Health Safety Environment and Labour.

VII. - (Unchanged)

Article 72a (new)

For any mobile device offered for sale on the national territory, the specific absorption rate is shown clearly and in French. Mention must also be made of the risks which may attach to a period of excessive use of the device.
